

## Drapery Cleaning

**I**n most homes, draperies are a magnet for household dust, soil and even odors. Has your drapery been severely soiled recently due to disaster or some other type of unfortunate incident? Are you experiencing unpleasant odors in your home that you can't positively identify? If so, consider our Drapery Cleaning Service.

The obvious method of determining whether your drapery is in need of cleaning is visual observation. A less obvious yet effective method is to try the "sniff test". Bring a section of drapery fabric to your nose and smell it. Does it smell clean and fresh, or does it leave a stale and offensive odor in your nostrils? Smelling is believing!

Our professional cleaning process removes most stains, contaminants and odors, and will leave your drapery looking and smelling clean and refreshed.

The best part of our drapery cleaning service is that we can clean your drapes right where they hang, without removing them. This avoids the inconvenience of removing and re-hanging the original drapes once they are cleaned, in addition to hanging and later removing temporary replacement curtains. In instances where replacement curtains are unavailable, our service ensures that your windows remain covered, and that your privacy remains intact.

## CARPET & UPHOLSTERY CLEANING

AUTO • RESIDENTIAL • COMMERCIAL • CARPET INSTALLATION

Each day that harmful soils are ground into your carpet fibers, it causes wear and unsightly traffic areas. Regularly scheduled cleaning removes deep-down dirt to prevent wear and help extend the life of your carpet.

Regular, professional cleaning not only extends the life of your carpet and upholstery investments, but also helps create a healthier home or work environment. Whether your needs are residential, government, or commercial carpet steam cleaning, Sure Clean has the carpet steam cleaning experience and tools to get the job done right. Our carpet steam cleaning staff is knowledgeable, courteous, and professional.

If you have any questions about our steam cleaning services, please give us a call. We want to prove to you that we are the most dependable & affordable steam cleaning service in the area. Our work speaks for itself.

## CARPET & UPHOLSTERY CLEANING

**Don't  
Trust  
Your  
Carpet  
To Just  
Anyone.**

## Carpet Cleaning

The major carpet manufacturers recommend a professional cleaning every 12 to 18 months to maintain the appearance and warranties of your carpeting. We can keep your carpet & furnishings looking their best with regular maintenance. Don't go a minute longer with stained, dingy or unhealthy carpets.

With over 14 years carpet steam cleaning experience, Sure Clean has been providing carpet steam cleaning services in North Carolina since 1990.

Not only do we specialize in carpet steam cleaning, we're also experts in:

- Upholstery Cleaning
- Drapery Cleaning
- Oriental Rug Cleaning
- Water Extraction
- Auto Carpet Cleaning
- 24 hour water damage restoration

## Oriental Rug Cleaning

Oriental rugs, of course, need special care. We handle oriental rugs as though they were priceless.

### Hand Washing Procedure

We will remove dry loose soil and precondition your rug with emulsifiers to loosen dirt and oils. We gently and thoroughly hand wash and rinse your delicate rug with a pH-balanced cleaning solution. Any spots on your rug are carefully removed with spot removers. The rug is then rinsed again to remove any spotting residues. After washing, a neutralizer is applied to restore the original pH of your delicate rug to make it like new.

### Dry Cleaning Procedure

We use the Host dry cleaning procedure that is especially formulated to clean natural fibers found in oriental rugs. The product will loosen the soils and leave the fibers soft without harming the dyes. Any spots on your rug are carefully removed with spot removers. Fringe cleaning and texturizing can also be done. Your rug is picked up and delivered at no additional charge

*Sure*

## Upholstery Cleaning

Considering how we use our furniture every day, the necessity for proper professional care becomes clear. Special attention must be given to cleaning upholstery as it can consist of different fibers. We wouldn't recommend using the same cleaning products for carpet on your upholstery as upholstery may consist of different types of fiber that need to be treated differently. When the correct care is given, upholstered furnishings will last for many years. Upholstery can be cleaned by steam, foam, or dry cleaning.

Professional upholstery cleaning can breathe new life into old furniture. We begin with an enzyme pre-spray to break up stubborn stains. Then we gently clean your furniture using our high-steam, light water-pressure method, for maximum cleaning effectiveness without soaking your cushions, foam, or backing. The result? A quicker drying time and beautifully fresh, clean furniture you'll be proud to have in your home.
